FUNCTION CONTROL

Chicago Electric Sales Inc. (Chicago Electric) and Function Control have partnered to bring Function Control's impressive sheet counting technology to the North American market. Function Control (Groningen, Netherlands) is a sister company to Chicago Electric and are both owned by BHS, the leading manufacturer of corrugating machinery. Function Control is well known in the paper and board industry for high accuracy sheet counting and laser marking equipment. Function Control is now able to extend their product line to North America with improved sales and service from Chicago Electric.

Chicago Electric is the exclusive sales channel for Function Control, adding this innovative technology to the Corr24 brand of upgrades Chicago Electric provides to the corrugating industry. Garrett Black, as Product Manager will coordinate sales and marketing activities in the fine paper, folding carton and corrugated board industries. In addition, Black intends to cultivate opportunities in other industries for the products. "I am excited to work with Niels and Function Control to see how we can take this technology to the next level."

Function Control was founded in 1987 and developed the first vision system for sheet counting. Today Function Control has more than 200 installations in over 25 countries worldwide. Their equipment is running in all the world's leading paper, folding carton and corrugated groups. Niels Kleinnibbelink, Managing Director of Function Control, is working diligently to assist Chicago Electric as they take on this new role. Kleinnibbelink proclaims, "I like what I am seeing from the Chicago Electric team. They are just the group of people we need to make our products an even bigger success."
